

Aquasoc Meeting March 25, 2014

Present: JVS, BB, SS, NS, JG, MA

Absent: OP, EB, EH, KC

Meeting purpose: transition between old and new exec

Goals for the year:

SS: continue what Meagan did, pay people, look good, reach out more to other clubs (discounts for them to hold events like DSD (in the summer) or OW (in the winter) with us).

JVS: wants to get the club life going more now that the business side is doing well, get night dives going again in a safe way. Continue the business side as is.

BB: go out personally to more classes and talk to people more, make a network throughout the courses (currently there is a drop off after people finish the course)

JG: go to some open water classes, get some of last years goals accomplished (fish hidden around the SUB that people can turn in for discounts → ongoing events as opposed to just single-day events), continue with one social event a month

NS: help with getting blogs/articles up on new website (and editing them), make sure those are linked in the newsletter

Website

-new one coming soon, but important to keep current one updated in the meantime

-SS will check in with geography student who is making us an interactive dive site map for the new website

Action Items:

-everyone send their exec blurb and picture to SS for the website

-exec dive once a month

-find a co-coordinator for the internet exec position because SS currently holds two position → also figure out how to distribute tasks. Recruit interested members.

-keep calendar updated

-SS will look into creating an online buddy search system/forum → could coordinate with the guy making our new website to make this possible

-NS to get our Twitter going

-we also want to transition to a Facebook page (not a group), but need to make sure the forum is ready before then

-JVS to talk to Brendan about night dives, etc. BB will attend this meeting

-JG to organize club social for early May

- all: go to one DSD or OW to talk about the club

END GOAL: get enough people out throughout the year to have an actual exec election!
